Contents of this Manual are applicable to the WPL School Info Add-On. Details of this Manual may be different based on the customizations you have or your software.

Introduction

This Manual contains information about the School Info Add-On, an extension for the WPL plugin.

The School Info Add-On is a powerful extension that enables real estate WordPress websites to find and show information of nearby schools to a certain listing.

System Requirements

To use the School Info Add-on you will need the following:

1. WPL PRO. (Do not install any add-on on WPL basic)
2. An API credential from one of the supported school sources.

Installation

If you have the Installation Package of the School Info Add-On, you can upload it from the following path: WordPress->WPL dashboard->Install Add-on form.

Supported School Sources

WPL School Info add-on uses external sources for finding schools. Currently it supports the following sources, but it's possible to integrate other sources if needed.

- 1- Great Schools. <http://greatschools.org>

1. **Radius:** It is used for specifying radius of school search based on Mile.
2. **Limit:** You can specify how many school shows on the single property page.
3. **Link Schools?:** Schools may have a profile page, WPL School Info add-on can link the school names to their profile page in the source website.
4. **Cache lifetime:** Due to API limitations and costs, School Info add-on won't send on the fly requests. It sends one request and saves the data into a cache file for a while and then uses the existing data instead of sending a new request. You can set the cache lifetime using this option.

Note: After changing activity options, You should clear the WPL cache. You can clear the WPL cache, you can navigate to WPL->Settings->Maintenance section.

School Info in the website front-end

There are 2 layouts in the School Info activity manager that you can select your desired layout.

You can see the results in a single property page by selecting the **default** layout.
