# Yelp Add-on (For WPL)

Realtyna Inc.

Contents of this Manual are applicable to the WPL Yelp Integration Add-On. Details of this Manual may be different based on the customizations you have or your software.

Introduction

This Manual contains information about the Yelp Integration Add-On, an extension for the WPL plugin.

Yelp integration Add-on is a tool to show nearby businesses close to the property. It loads the businesses on the property details page. You can filter the businesses using the yelp activity too so you can simply choose which categories should show on the property details page.

System Requirements

To use the Yelp Integration Add-on you will need the following:

1. WPL PRO (You cannot install any add-on to the WPL basic)
2. An API key from **Yelp** Company.

Installation

If you have the Installation Package of the Yelp Add-On, you can upload it from the following path: WordPress->WPL dashboard->Install Add-on form.

You can download the installation package of Yelp add-on from Realtyna's billing website.

Configuration

Get an API Key from BKFS

You'll need to register with a Yelp user account. If you don't already have one, please visit https://www.yelp.com/signup to sign up for one now.

Once you have a Yelp user account and have signed in, you can go to the Manage App page to create an app with Yelp. Then, you'll get your API Key, which you can use in Yelp integration add-on.

Yelp Activity

After installing the Yelp add-on a new activity will add to your website automatically. This activity used for showing the nearby businesses on the property details page. You can enable this activity and set the API key that you received from Yelp website.

Also there are several filter and sort options there to help you display what you want.
