

User Analytics Add-on

REALTYNA - SALES DEPARTMENT

Last update: Jan, 2023

Contents of this Manual are applicable to the WPL User Analytics Add-On. Details of this Manual may be different based on the customizations you have or your software.

Introduction

This Manual contains information about the User Analytics Add-On, an extension for the WPL plugin. User Analytics Add-on is a tool to show some stats regarding popular listings and most performed searches. You can see those stats directly in WPL backend and also you're able to create your desired reports with different time periods. Also if you have WPL Neighborhoods or WPL Complex Add-Ons installed then you can see stats of popular complexes and neighborhoods too.

System Requirements

To use the User Analytics Add-on you will need the following: 1. WPL PRO (You cannot install any add-on to the WPL basic)

Installation

If you have the Installation Package of the User Analytics Add-On, you can upload it from the following path: WordPress->WPL dashboard->Install Add-on form. You can download the installation package of User Analytics Add-on from Realtyna's [billing](#) website.

Result

After installing the User Analytics Add-on, it starts to save visits and search stats and you can see the results on WPL -> User Analytics menu. You're able to change the time period or insert two custom start and end dates.

Most Popular Listings ▼ Custom Dates ▼ Search

From 28/12/2018 

To 05/01/2019 

You will see a list and a chart below the generated report form.
