

Market Reports Add-on (For WPL) Realtyna Inc.

Contents of this Manual are applicable to the WPL Market Reports Add-On. Details of this Manual may be different based on the customizations you have or your software.

Introduction

This Manual contains information about the Market Reports Add-On, an extension for the WPL plugin.

Market Reports Add-on is a tool to show some stats regarding popular listings and most performed searches. You can see those stats directly in WPL backend and also you're able to create your desired reports with different time periods.

Also if you have WPL Neighborhoods or WPL Complex Add-Ons installed then you can see stats of popular complexes and neighborhoods too.

System Requirements

To use the Market Reports Add-on you will need the followings:

1. WPL PRO (You cannot install any add-on to the WPL basic)

Installation

If you have the Installation Package of the Market Reports Add-On, you can upload it from the following path: WordPress->WPL dashboard->Install Add-on form.

You can download the installation package of Market Reports add-on from Realtyna's billing website.

Results

After installing the Market Reports add-on, it starts to save visits and search stats and you can see the results on WPL->Market Reports menu. You're able to change the time period or insert two custom start and end dates.

The screenshot displays a search interface with the following elements:

- A dropdown menu set to "Most Popular Listings".
- A dropdown menu set to "Custom Dates".
- A blue "Search" button.
- A "From" date field containing "28/12/2018" with a calendar icon.
- A "To" date field containing "05/01/2019" with a calendar icon.

You will see a list and chart below the generate report form.
